- Programming languages: JavaScript (ES6), TypeScript, HTML, CSS, SASS
- Front-end frameworks and libraries: React, Next JS, Redux, Redux/toolkit, Bootstrap, Material UI, Tailwind CSS, PusherJS, Firebase, WebSocket
- Back-end frameworks: Node.js, Express.js
- Build tools: Webpack, Babel
- Version control: Git
- Testing frameworks: Jest, Enzyme, Testing-Library React

Work Experience

Front End Developer, Simaat

Sheikh Zayed, Egypt (Remotely), Nov 2022 – Present

- Refactored and optimized the auction platform with Next.js and Redux.
- Implemented custom hooks and maintained the feature core of the auction platform, ensuring code reusability and maintainability.
- Integrated a real-time WebSocket using PusherJS to see all changes intermediately.
- Configured CI/CD pipelines in GitHub actions and cPanel build process in different environments

Front End Developer, Flowtechtics

Alexandria, Egypt (on-site), Oct 2021 - Nov 2022

- Worked with a React and Redux/Toolkit environment on a major enterprise product from scratch to production.
- Implemented custom hooks and reusable components.
- Created and developed responsive and user-friendly dashboards for both applications, enabling easy navigation and data visualization.

Education

Bachelor of law (L.L.B)

Alexandria University, Oct 2013 - May 2019
